

Master of Advanced Studies Program in Marine Biodiversity & Conservation  
*Scripps Institution of Oceanography*  
**Alumni Snapshot\***

Within six months of graduation, 89% of graduates from the 2018 MAS MBC cohort have secured satisfying, challenging positions as directors, founders, scientists, fellows, specialists and more. More than 75% of these positions are in marine or coastal conservation.

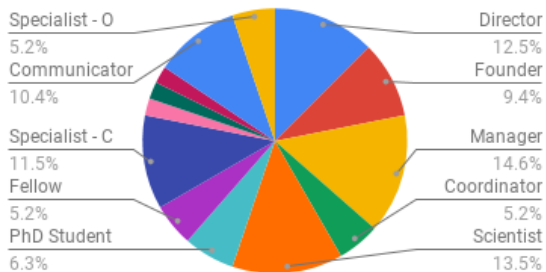

These employment statistics and titles reflect the powerful training, expertise and guidance our students receive while in the MAS MBC program, as well as our top-quality reputation and the marketability of our graduates.

Alumni 6 Months After Graduation

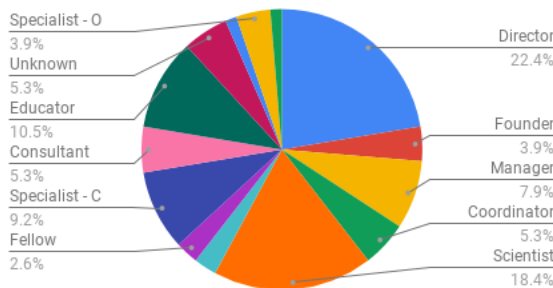

Updated December 2018

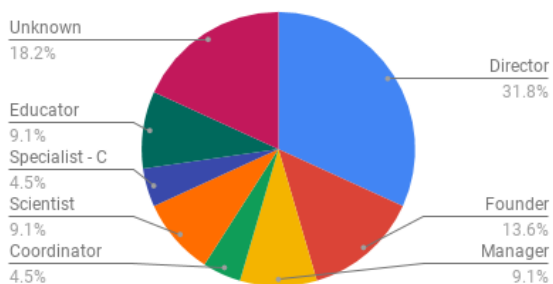

Alumni 1-5 Years After Graduation

Alumni 6-10 Years After Graduation

Alumni 10+ Years After Graduation

Our alumni promote quickly within the conservation field and with demonstrated success. Over 36% of alumni are founders, directors or managers within five years of graduation. After ten years since graduation, that number goes up to nearly 55%, with more than 30% holding director, administrator or officer titles.

MAS MBC alumni are effective and recognized leaders who spearhead research, found innovative for-profit companies, lead agencies, create policy, craft effective communication strategies, educate youth and adults, direct NGOs, produce films and impact marine conservation in meaningful and prominent ways. As presidents, directors, scientists, analysts, researchers, specialists, consultants, communicators, biologists, filmmakers and attorneys, our alumni are changing the way the world understands and manages our coastal and ocean resources.

*\*All statistics are based on December 2018 data for our 213 current alumni. "Director" includes officers and administrators. "Specialist-C" means graduates are specialists in a conservation-related field. "Specialist-O" means graduates are working as specialists in another field.*
